(54) Title: COLLECTING BAG HAVING AN ACCOMMODATING MEANS FOR A CLOSURE DEVICE

(57) Abstract: The collecting bag comprises a bag member (1) and a discharge portion (6) including a closure device (7). An accommodating means (8) is provided within the outer contours of the bag member for accommodating at least a part of the discharge portion in the position of use of the bag. The accommodating means includes a slit (20) in the comfort layer (52) overlying the front film blank (2), such that a part of the discharge portion may be lodged in the space between joint sections that connect inner tubular film elements with the film blanks of the bag member.

\* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \* & \* document member of the same patent family
